SMARTER CLEANING

The Rubbermaid HYGEN™ Clean Water System features a Filter Bucket and Wringer with built-in scrubbers to help loosen and remove debris from the mop. Twin rollers allow for optimized wringing efficiency, and an innovative filtering system processes dirty water into clean water with a simple tilt of the bucket.

ROLLER WRINGER

Twin roller design provides optimized wringer efficiency.

See it in
ACTION

www.rubbermaidhygen.com

ADJUSTABLE MOISTURE LEVEL

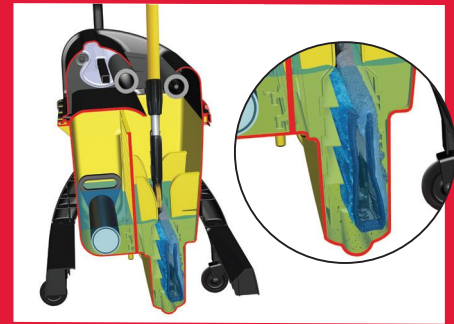

Allows users to select desired mop dampness.

FLOOR DRAIN

Empties bucket without lifting.

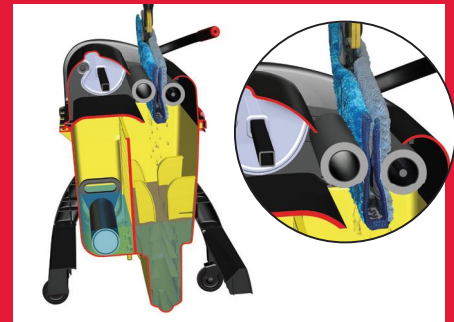

COMPLETE SYSTEM

Fits all Rubbermaid Commercial Products cleaning carts.

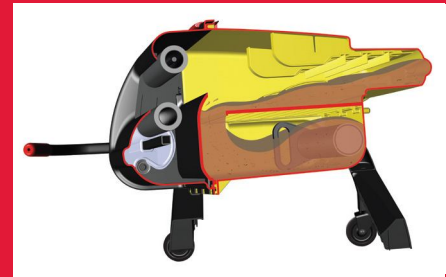

RINSING AND SCRUBBING

Insert the mop into the bucket. Move the mop up and down to enable the built-in scrubbers to remove soil from the mop.

WRINGING

Lift the mop to position it between the two rollers located at the top of the bucket. Press the handle down to wring the mop. Turn the adjustment dial to select your desired moisture level.

TRANSFERRING

Tilt the bucket 90 degrees by pressing the handle. This allows the dirty water to transfer to the chamber that has the integrated filter.

FILTERING

Once the water is completely transferred to the filter chamber, rotate the bucket back to its original position. Clean, filtered water will flow back into the mopping chamber, ready for mopping.

WAVEBRAKE®

WaveBrake's revolutionary bucket shape with molded-in wave breaks reduces splashing up to 40% for safer, easier, and more efficient mopping.

WaveBrake® Mopping Systems

Rubbermaid is the world's leading manufacturer of mop buckets.

Improve productivity and help reduce labor costs! WaveBrake® Mopping Systems reduce splashing for safer, easier, and more efficient mopping. WaveBrake® Mopping Systems can handle any mopping job with ease, in sizes from 26 quarts to 44 quarts.

DIRTY WATER BUCKET

- Separates dirty water from clean water
- Preserves the quality and cleaning power of cleaning solution
- Reduces water and chemical usage
- Helps produce cleaner, less slippery floors
- Divides liquid weight; less lifting power needed when emptying buckets

HOW IT WORKS

Traditionally, wringers release dirty water directly back into the bucket's primary cleaning water.

Rubbermaid's Dirty Water Bucket nests below the WaveBrake® Wringer to collect the dirty water and keep it separate from the cleaning solution.
